## About Us

Devorix is a forward-thinking software development company dedicated to delivering powerful, scalable, and user-focused digital solutions. Our team of passionate Full Stack Developers specializes in both frontend and backend development, turning ideas into seamless, high-performing web applications. Every project we build emphasizes speed, security, scalability, and exceptional user experience.

## Our Expertise

Frontend Development	Responsive UI design using HTML5, CSS3, Tailwind CSS, and JavaScript (ES6+). 
Backend Development	Robust server-side development with Node.js and Express.js. Database integration
Additional Skills	JWT Authentication & Authorization. Deployment and Server Optimization. Mic

## Our Mission

At Devorix, our mission is to empower businesses through custom software development that enhances productivity, simplifies processes, and drives growth. We strive to craft digital products that are not only functional but also elegant and intuitive.

## Our Recent Projects

- Full-Stack Web Application Development: Designed and implemented dynamic web applications integrating Angular on the frontend with Node.js and Express.js on the backend.
- Responsive Website Design: Collaborated with UI/UX experts to create visually appealing and responsive layouts.
- Authentication Systems: Built secure authentication systems using Firebase and Node.js.

## Why Choose Devorix

- Full-cycle development — from concept to deployment.
- Cross-functional team with expertise in modern frameworks.
- Focus on clean, maintainable, and scalable code.
- Commitment to deadlines and client satisfaction.

## Education & Background

Our lead developers hold Bachelor's Degrees in Computer Science (BZU University, 2020–2024) and possess professional experience in full-stack web development, frontend architecture, and backend systems design.
